

List the steps of the workflow you mapped. For each, do not ask 'can AI do this faster'. Ask 'where does AI multiply a person'.

WORKFLOW STEP	WHERE AI MULTIPLIES THE HUMAN	LEVERAGE
1		☐ L ☐ M ☐ H
2		☐ L ☐ M ☐ H
3		☐ L ☐ M ☐ H
4		☐ L ☐ M ☐ H
5		☐ L ☐ M ☐ H
6		☐ L ☐ M ☐ H
7		☐ L ☐ M ☐ H
8		☐ L ☐ M ☐ H

e.g. 3. Tone + citation review · Claude drafts both, reviewer judges edge cases · H

The single highest-leverage point

The one step where AI multiplies a person the most. This is what the redesign in R will target.

Step

Why it multiplies

Common trap: marking High on the steps you find interesting instead of the steps that repeat. Leverage = multiplication x frequency.
